

Report on Committee on Financial and Securities Law 2017

CFinSL has organized a program of 8 seminars covering both the substance and the practice of financial and securities law. Four seminars (on overview, listed companies, investigations, and market misconduct) took place in the second half of 2017. The other four seminars (on disclosure, accounting, transactions, and recent developments) are scheduled for the first half of 2018.

CFinSL has this year considered 3 government or regulatory consultations on legislative amendments or rule changes. Considering the nature of the issues, the committee did not advise the Bar Council to make any substantive submission.
